

Analyst Profile

Name: Ralph Cruwys

Occupation: Senior Analyst

Location: Canberra / Australia

Experience: more than 35 years in Information Technology

Ralph Cruwys has more than 35 years, with an impressive body of work in the security process and identity domains. His experience across Government ranges from Defense, to large Government agencies such as Department of Human Services; and more recently with the Attorney Generals Department and Department of Health. Ralph has been associated with the architecting of a number of large enabling system projects, designing solutions, evaluating appropriate technologies and managing implementations. He was producing an Identity and Access Management Framework for the National Security Community (iAMNSC) for the Australian Government and developing the business requirement, writing the Request for Tender and evaluating Proposals for the Australian Department of Defense JP2099 Identity & Access Management Project as Project Lead with the development of a solution / security architecture and implementation approach which would enable an appropriate solution for the Australian Department of Defense.

Roles & Responsibilities:

Ralph Cruwys joined KuppingerCole in 2016 as a Senior Analyst in the Asia Pacific team based in Canberra Australia; with responsibility for Cyber Security, Digital Transformation for Government & Health; Identity Cards and Federation & Trust Frameworks.
